

Lab 6 Tasks

Advanced Workshop

Spring 2026

- SE Assignment 4 (from Lecture 6) has been released in iSpace.

Tasks

1. SRS partial document review

- Feedback from last week's submission

2. Students

- A. Update your last week's submission according to feedback
- B. Prepare Class Diagram
- C. Prepare Sequence diagram for use case(s)

Task 1A: Feedback

- Lab 5 has not be graded yet.
 - Grading for Lab 5 (complete transition diagrams) should be completed next week during Reading Week.

Task 1A: Feedback

Some important points mentioned in **last lab**

- All states in the transition diagram and their corresponding UIs must **exactly match**.
 - The number and label must match.
 - The controls must match.
- All UIs are in one file, organized numerically, like
 - UIs for **Login and Home Pages** begin with **1**.
 - UIs for **Search**, **Edit** and **Export** pages begin with **2**.
 - UIs for **Utilities** begin with **3**.
 - UIs for **Admin** and **Maintenances** begin with **4**.
 - A UI cannot appear more than once in the UI file.

Task 2A: Update your SRS

- Update your Lab 5 submission after you receive your feedback during Reading Week next week.
 - Update next week so you won't have too much to do when we meet in 2 weeks.
 - In 2 weeks, you will also need to update your Lab 6 submission.

Task 2B: Prepare Class Diagram

- Complete the class diagram.
 - Only the **participating classes** should be included in the diagram
 - See Lectures 6 and 7
 - Corresponding important attributes and operations should be included in the classes.
 - Important in the sense that these attributes and operations are needed to understand the class diagram.
 - Other attributes and operations can be filled in later in the detailed design.
 - Put the class diagram in the SRS document Appendix B. (Remember to give the figure label for the diagram.)

Task 2C: Prepare Sequence Diagram

- Do the **sequence diagram** for the mentor's use case Search students' info.
 - Refer to Lectures 6 and Lecture 7 (including Slides 35 to 37).
 - Put the diagram in the SRS Appendix B
 - Remember to give the figure label for the diagram.

Submission

- Each team (company) submits the partial **SRS (ONE copy)** to iSpace and GitLab.
 - **Deadline*: noon Sat 4 Apr 2026**
 - On the cover of the SRS next to the student names, leaders (with the support of most of the team) indicate how much each member contributed: Full, Fair, Little or None.
 - Note: two grade (SE rubrics: model) will be given, one for the state class diagram and one for the sequence diagram.

* Usually, we give a few more minutes of grace period, in case of any network or unusual problems. But please respect the deadline; the length of the grace period is NOT guaranteed.
